## Read more about this **groundbreaking event.**

Trump's Project 2025 is not just another policy plan—it's a sweeping 922-page manifesto for a conservative revolution that threatens to dismantle our hard-won rights and freedoms. It is tightly linked to Trump's Agenda 47, which was crafted by the same architects who served Trump in his last administration. They will push through their extreme agenda on Day One if Trump seizes power again.

Trump knows how dangerous Project 2025 is to his chances, and has tried to disavow it at his rallies, pretending ignorance. But don't be fooled—this is a deliberate lie. The key players behind Project 2025, including his VP pick JD Vance, Tom Homan, Peter Navarro, and Ric Grenell, proudly championed it at the RNC convention.

This plan is a direct assault on our democracy and freedoms. To stop Trump-Vance, we must **unite, educate** ourselves and our patients, and **VOTE** against this dangerous agenda. The future of our rights depends on it.
